ABOUT US

OUR VISION

Bokamoso Geomatics intends to be the leading Service Provider of choice in the fields of Geomatics, that being Cadastral & Engineering Surveys, Mapping, Land Management & Information, GIS and Land Reform in the African continent particularly the SADC region.

OUR MISSION

Our mission is to provide excellent quality service to our direct clients and the broad stake holders through highest standard of ethics, honesty, integrity & teamwork.

DIRECTORS PROFILE

Mr. Kereng Senna first completed his ND Land Surveying in 2007 from the Polytechnic of Namibia in Windhoek. After completing his ND Survey education, he then started working at the Surveyor General Office in Mpumalanga from March 2008.

In 2012, He applied for a bursary to further pursue a degree in Surveying. He went on to complete his BSc. Land Surveying from the University of Kwa-Zulu Natal (UKZN) in 2016.

He served his articles with TJ Mosiane Geomatics from 2017 in which he got extensive training in broad geomatics fields. Mr. Senna also did his Town and Regional Planning training with Phure Consulting in Rustenburg in 2018. He further continued with his articles at Van Staden Land Surveyor in Nelspruit, and CAD Mapping Aerial surveyors in Hatfield, where he learned more about aerial surveys and photogrammetry.

Mr. Senna is a member of the South African Geomatics Council (SAGC), registered as a Professional Land Surveyor and a member of a Voluntary Association, South African Geomatics Practitioners Association (SAGPA)

While still doing his training as a Candidate Professional Land Surveyor, Mr. Senna registered Bokamoso Geomatics in 2018 which he is the director and the land surveyor at.

Mr. Senna's experience extends from cadastral surveying, sectional titles and engineering Surveys. He has gained experience in volumetric Surveying, photogrammetry, GIS and Town Planning. He has used a variety of Survey equipment's and software in the field. His technology endeavor is to use advanced technology in survey to deliver quality service in Surveying Services Rendered .

SKILLS TRANSFER

Workshops: Our company will host workshops to the staff showing step by step processes on Land Surveys procedures

Presentations: Results can be presented to a panel of staff, outlining all and providing understanding of the final results of all projects.

Demonstrations: Practical demonstration of survey instruments can be performed to the departmental staff, on how to use survey instruments of a specific departmental project.

QUALITY ASSURANCE PROPOSAL

Bokamoso Geomatics ensure quality in all its projects, by ensuring that Land Survey standards are adhered to.

As part of quality assurance, our work before we submit it to the client is sent out to an outsourced private land surveyor to ensure quality in final results.
